

CONTENTS

Preface ix

1 Microcomputer architecture 1

- 1.1 Introduction 1
- 1.2 Coding systems 1
- 1.3 Number codes 2
- 1.4 Alphanumeric codes 6
- 1.5 A microcomputer system 6
- 1.6 Device addressing and data buses 9
- 1.7 Memory devices 10
- 1.8 The Z80: general organization and operation 11
- References 14

2 Software 15

- 2.1 Introduction 15
- 2.2 The Z80 assembly code programming 18
- 2.3 CONTROL BASIC 21
- 2.4 Illustrative example in both high-level and low-level languages 29
- References 33
- Exercise 33

3 Interfacing 35

- 3.1 Parallel interfacing 35
- 3.2 I/O control 37
- 3.3 Interrupts 38
- 3.4 Interrupt priorities 41
- 3.5 Serial input/output 42
- 3.6 The programmable PIO chip 43
- 3.7 Standard interfaces 43
- 3.8 Analog interfaces 47
- References 55

4 Theory of digital control systems 57

- 4.1 Introduction: closed-loop control 57
- 4.2 Digital control strategies 60
- 4.3 Sampling 60
- 4.4 Difference equations 67
- 4.5 PID or three-term control 71

4.6	Stability of digital control systems	79
	References	83
	Further reading	84
	Exercises	84
5	Measurement and Data Logging	85
5.1	Analog signal recording	85
5.2	The development system	88
5.3	Simple analog input/output programs	88
5.4	A half-wave rectifier	91
5.5	A full-wave rectifier	91
5.6	Analog input and output using CONTROL BASIC	93
5.7	Interrupt control of an ADC	94
5.8	The computer as an analog signal delay	96
5.9	A roll-mode storage oscilloscope	100
5.10	Transducer linearization using a look-up table	107
6	Sequence control	109
6.1	Introduction	109
6.2	The sequencing unit	111
6.3	Problem specification	115
6.4	Software development	115
	Reference	123
	Exercises	123
7	Applications of closed-loop control	125
7.1	Introduction	125
7.2	A fluid level control system	126
7.3	A position control system	146
	References	160
	Exercises	160
Appendices		
A.1	Answers to exercises	163
A.2	Rules for manipulating two's complement numbers	167
A.3	Table of decimal, octal, and hexadecimal numbers	171
A.4	ASCII character codes and their binary representation	172
A.5	Z80 instruction set	174
A.6	Software relating to Chapter 7	178
Glossary 185		
Index 193
