

S O M M A I R E

INTRODUCTION	9
LISTE DES PARTICIPANTS	11
J.A. ARMSTRONG, P. ESHERIK, J.S. WYNNE	
<i>Comments on the spectra of Ca, Sr and Ba near their ionization limits</i>	15
A.D. BANDRAUK	
<i>Predissociation and the Landau-Zener model revisited</i>	27
J.E. BAYFIELD	
<i>Chains of resonant microwave multiphoton transitions in highly excited hydrogen atom</i>	43
J. BERLANDE, F. GOUNAND, J. PASCALE	
<i>Atomic collisions at thermal energies involving alkali-Rydberg states</i>	55
P. CAMUS, R.J. CHAMPEAU, S. FENEUILLE, S. LIBERMAN, C. MORILLON, J. PINARD	
<i>Rydberg and valence states in alkaline earths</i>	67
M.S. CHILD	
<i>Semi classical analysis of diatomic predissociation</i>	75
C. COHEN-TANNOUJJI, P. AVAN	
<i>Discrete state coupled to a continuum. Continuous transition between the Weisskopf Wigner exponential decay and the Rabi oscillation</i>	93
J. DURUP	
<i>Photofragment spectroscopy of some diatomic species</i>	107
P. ERMAN	
<i>Lifetime measurements by electron impact excitation of diatomic molecules with regard to predissociation</i>	119
U. FANO	
<i>The manifold aspects of Rydberg states</i>	127
U. FANO	
<i>Remarks on predissociation and autoionization</i>	139
R.W. FIELD	
<i>Transitions near dissociation limits by optical-optical double resonance and optically pumped laser spectroscopy</i>	143
T.F. GALLAGHER	
<i>Studies of atomic Rydberg states</i>	157
W.R.S. GARTON	
<i>Autoionization and predissociation</i>	167
A.Z. GRASIUK	
<i>Excitation and dissociation of molecules by new I.R. laser sources</i>	183
W. HAPPER, G. MOE, A.C. TAM	
<i>Highly excited alkali-noble gas excimers</i>	197
S. HAROCHE, C. FABRE, P. GOY	
<i>Millimeter spectroscopy in Rydberg levels</i>	207
P. JACQUINOT, S. LIBERMAN, J. PINARD	
<i>High resolution spectroscopy of Rydberg states of Rubidium</i>	215
D. KLEPPNER	
<i>Some recent studies of Rydberg states of one-and two-electron atoms</i>	227

N. LE DOURNEUF, VO KY LAN	
<i>Collisional approach for external properties of atomic systems</i>	235
R. LEFEBVRE	
<i>Level shifts and widths for diatomic and triatomic systems from coupled equations</i>	253
H. LEFEBVRE-BRION, A. GIUSTI-SUZOR	
<i>Calculations of the resonance width for some two-electron processes in diatomic molecules</i>	267
J. LOS, P.J.C.M. NOWAK	
<i>Rotational predissociation of small molecular ions</i>	281
R.F. STEBBINGS	
<i>Thermal collisions involving atoms in single Rydberg states</i>	297
B.P. STOICHEFF, K.C. HARVEY, Y. KATO	
<i>Two-photon absorption to high 2D Rydberg states of atomic Rubidium</i>	307
J.B. TELLINGHUISEN	
<i>The Franck Condon principle in diatomic bound-free transitions</i>	317
J. VIGUE, M. BROYER	
<i>Gyroscopic, hyperfine and magnetic predissociations of molecular iodine</i>	333
E.F. WORDEN, R.W. SOLARZ, J.A. PAISNER, K. RAJNAK, B.W. SHORE, J.G. CONWAY	
<i>Rydberg series in the Lanthanides and actinides observed by stepwise laser excitation</i>	341
RÉSUMÉS DES COMMUNICATIONS	355
