

# Contents

## 1. Introduction to Digital Image Processing

- Definition and applications of image processing
- Human visual system
- Image acquisition systems
- Digital image representation
- Image processing fundamentals

## 2. Image Sampling and Quantization

- Spatial and gray-level resolution
- Sampling theory
- Quantization methods
- Image digitization errors
- Image storage formats

## 3. Mathematical Foundations

- Matrix operations
- Probability and statistics for images
- Vector spaces and transforms
- Convolution and correlation
- Linear systems theory

## 4. Image Enhancement in the Spatial Domain

- Point processing operations
- Histogram equalization
- Contrast stretching
- Spatial filtering
- Noise reduction techniques

## 5. Frequency Domain Processing

- Fourier transform
- Discrete Fourier transform (DFT)
- Fast Fourier transform (FFT)
- Frequency filtering
- Image smoothing and sharpening

## **6. Image Restoration**

- Image degradation models
- Inverse filtering
- Wiener filtering
- Blind deconvolution
- Restoration applications

## **7. Color Image Processing**

- Color models (RGB, HSV, CMY)
- Color transformations
- Color enhancement
- Pseudo-color processing
- Color segmentation

## **8. Image Compression**

- Redundancy in images
- Lossless compression
- Lossy compression
- JPEG compression
- Wavelet-based compression

## **9. Morphological Image Processing**

- Structuring elements
- Dilation and erosion
- Opening and closing
- Boundary extraction
- Morphological filtering

## **10. Image Segmentation**

- Edge detection techniques
- Thresholding methods
- Region-based segmentation
- Clustering algorithms
- Watershed segmentation

## **11. Feature Extraction and Representation**

- Shape descriptors
- Texture analysis
- Boundary representation
- Feature vectors
- Pattern descriptors

## **12. Pattern Recognition and Classification**

- Statistical classification
- Neural network approaches
- Support vector machines
- Object recognition
- Machine learning methods

## **13. Computer Vision Applications**

- Face recognition
- Medical image analysis
- Remote sensing
- Industrial inspection
- Multimedia and robotics
