

CONTENTS

<i>Preface</i>	(xi)
1. Digital Communication Introduction	1
1.1 Introduction	1
1.2 Signal	1
1.3 Analog to Digital Conversion	3
1.4 Elements of Digital Communication	3
1.5 History of Communications Systems	5
<i>Review Questions</i>	8
2. Sampling of Base Band Signal	9
2.1 Introduction	9
2.2 Nyquist-Shannon Sampling Theorem	9
2.3 Sampling Techniques and Practical Aspects of Sampling	16
2.4 Sampling Theorem for Band Pass Signal	21
<i>Review Questions</i>	25
3. Digital Coding Techniques	26
3.1 Pulse Code Modulation	26
3.2 Differential Pulse Code Modulation (DPCM)	36
3.3 Delta Modulation	40
3.4 Adaptive Delta Modulation	45
3.5 Continuously Variable Slope Delta Modulation (CVSD)	47
<i>Review Questions</i>	48
4. Digital Base Band Transmission	49
4.1 Line Coding	49
4.2 Power Spectrum of Line Coding Signals	50
4.3 Power Spectrum of Unipolar Formate (NRZ)	51
4.4 Power Spectrum of Polar Formate (In NRZ Formate)	52
4.5 Power Spectrum of Bipolar Formate (In NRZ Formate)	52
4.6 Power Spectrum of Manchester Coding (In NRZ Formate)	54
4.7 Intersymbol Interference (ISI)	55
<i>Review Questions</i>	59
5. Digital Multiplexing	60
5.1 Time Division Multiplexing (TDM)	60
5.2 Digital Multiplexer	62

5.3 The T1 Digital System	62
<i>Review Questions</i>	65
6. Digital Modulation Techniques	66
6.1 The Gram-Schmidt Procedure	66
6.2 Digital Modulation Techniques	68
6.3 Amplitude-Shift Keying (ASK)	69
6.4 Phase Shift Keying (PSK)	72
6.5 Frequency Shift Keying (FSK)	74
6.6 Differential Phase Shift Keying (DPSK)	76
6.7 Quadrature-Shift Keying (QPSK)	78
6.8 Minimum Phase Keying (MSK)	80
<i>Review Questions</i>	81
7. Detection of Digital Signals	82
7.1 Optimum Receiver for Data Communication	82
7.2 Optimum Filter	82
7.3 Calculation of Optimum - Filter Transfer Function (MIF)	85
7.4 The Matched Filter	87
7.5 Coherent Reception : Correlation	90
7.6 Error Probability in the Coherent Detection of Binary ASK	92
7.7 Error Probability in the Coherent Detection of Binary Phase Shift Keying	94
7.8 Error Probability in the Coherent Detection of Binary Frequency Shift Keying	94
7.9 Error Probability of Coherent Detection of Quadrature Phase Shift Keying	96
7.10 Error Probability of MSK	98
7.11 Comparison of Noise Performance of Digital Systems	98
<i>Review Questions</i>	102
8. Information Theory	103
8.1 Concept of Information	103
8.2 Entropy	105
8.3 Rate of Information	105
8.4 Self Entropy	105
8.5 Joint Entropy and Conditional Entropy	105
8.6 Relation between the Different Entropies	107
8.7 Mutual Information	108
8.8 Channel Capacity	109
8.9 The Transmission Efficiency and Redundancy	109
8.10 Kraft Inequality	110
8.11 Source Coding Theorem	111
8.12 Prefix Coding	111
8.13 Shannon-Fano Coding	111

8.14 Huffman Coding	112
8.15 Continuous Channel	112
<i>Review Questions</i>	125
9. Error Correcting Codes	126
9.1 Error Control Coding	126
9.2 Block Code (Arithmetic Codes/Group Codes)	127
9.3 Decoding of Linear Block Code Using Syndrome Matrix	130
9.4 Hamming Code	134
9.5 Decoder Designing for Syndrome	136
9.6 Cyclic Codes	138
9.7 Convolutional Coding	149
9.8 Code Tree	153
9.9 Code Trellis for Convolutional Encoder	158
9.10 State Diagram for Convolutional Coding	159
9.11 Maximum-Likelihood Decoding of Convolutional Code	159
9.12 Sequential Decoding	161
<i>Review Questions</i>	162
Index	163
