

Table of Contents — *Basic Electricity and Electronics*

Part I — Electricity

1. Electric Field

- Electric charge
- Electric potential and voltage
- Conductivity
- Capacitance and capacitors
- Dielectrics and insulating materials

2. Direct-Current Circuits

- Electric current
- Ohm's law
- Resistance and conductance
- Electrical power and energy
- Kirchhoff's laws
- Series and parallel circuits

3. Electromagnetism

- Magnetic field
- Magnetic flux
- Electromagnetic induction
- Applications of electromagnetism

4. Direct-Current Electric Machines

- DC generators
- DC motors
- Operating principles

5. Alternating Current — Basic Concepts and Definitions

- Alternating current
- Period and frequency
- Amplitude
- Phase

6. Single-Phase AC Circuits

- Resistance

- Inductance
- Capacitance
- Impedance
- AC power

7. Three-Phase Networks

- Three-phase systems
- Star (Y) connection
- Delta (Δ) connection
- Three-phase power

8. Electrical Measurements and Instruments

- Voltage measurement
- Current measurement
- Resistance measurement
- Electrical measuring instruments

9. Transformers

- Transformer principle
- Ideal and real transformers
- Turns ratio
- Applications

10. Alternating-Current Electrical Machines

- AC motors
- AC generators
- Operating principles

11. Electric Drive and Control Equipment

- Electrical drives
- Control systems
- Protection equipment

12. Electric Power Transmission and Distribution

- Electrical networks
- Power transmission
- Distribution systems
- Cables and lines
- Grounding and electrical safety

Part II — Basic Electronics

13. **General Outline of Electronic Processes**
14. **Vacuum Triodes and Multi-Electrode Tubes**
15. **Gas-Filled Tubes**
16. **Semiconductor Devices and Their Application**
 - Semiconductors
 - PN junction
 - Diodes
 - Transistors
 - Semiconductor applications
17. **Photoelectric Devices**
18. **Rectifiers**
 - AC-to-DC conversion
 - Rectifier circuits
 - Power supplies
19. **Audio-Frequency Amplifiers**
 - Amplification
 - Amplifier stages
 - Low-frequency amplifiers
20. **Electronic Oscillators and Oscilloscopes**
 - Electronic oscillators
 - Signal generation
 - Oscilloscope
21. **Electronic, Solid-State and Photoelectric Relays**
22. **Fundamentals of Computers**
23. **Industrial Applications of Electronics —
Automation**
