

Contents :

Front Matter

- Dedications
- Preface
- Organizational and Topical Coverage
- Who Should Read This Book
- Acknowledgements
- About the Author
- Foreword

Chapter 1 — IPTV: The Ultimate Viewing Experience

- Defining IPTV
- IPTV vs Internet TV
- IPTV networking infrastructure
- IPTV applications and services
- IPTV market growth drivers
- IPTV standardization initiatives
- Summary

Chapter 2 — IPTV Network Distribution Technologies

- Broadband distribution networks
- IPTV over fiber networks
- IPTV over ADSL
- IPTV over cable TV networks
- IPTV over wireless networks
- IPTV over the Internet
- IPTV backbone technologies
- IPTV deployment factors
- Summary

Chapter 3 — IPTV Real-Time Encoding and Transportation

- Real-time video encoding
- Compression methods
- Packetizing video content
- Encapsulation techniques
- IPTV transport methods
- Summary

Chapter 4 — Broadcasting Linear Programming over IPTV

- End-to-end IPTV video components
- IPTV streaming approaches
- IPTV multicasting
- IPTV multicast architecture
- IPv6 multicasting
- Channel changing fundamentals
- Fast channel switching techniques
- Program information discovery
- Time-shifted multicast IPTV
- Summary

Chapter 5 — IPTV Consumer Devices (IPTVCDs)

- Residential gateways
- Gateway architecture and functionality
- Industry standards
- Digital set-top boxes
- Evolution of set-top boxes
- IP set-top boxes
- Emerging IPTV consumer devices
- Summary

Chapter 6 — IPTVCD Software Architecture

- IPTV consumer device software
- Interactive TV middleware
- Middleware standards
- Proprietary middleware solutions
- Summary

Chapter 7 — IPTV Conditional Access and DRM Systems

- IPTV security
- Conditional access systems
- Security initiatives
- Digital Rights Management (DRM)
- IPTV intranet protection
- Summary

Chapter 8 — Moving IPTV Around the House

- Whole Home Media Networking (WHMN)
- Home networking technologies
- Fast Ethernet and Gigabit Ethernet
- 802.11n wireless networking

- HomePlug AV
- HomePNA
- Multimedia over Coax Alliance (MoCA)
- Middleware software standards
- QoS for home IPTV applications
- Summary

Chapter 9 — Video-on-Demand (VoD) over IP Delivery Networks

- History of Pay-Per-View
- IP-based VoD services
- VoD infrastructure
- Integration with IP services
- Protecting VoD content
- Summary

Chapter 10 — IP-Based High Definition TV

- SDTV and HDTV technologies
- HDTV over IP
- End-to-end IP HDTV systems
- Summary

Chapter 11 — Interactive IPTV Applications

- Evolution of interactive TV
- Interactive IPTV services
- Program-related interaction
- Deployment of interactive IPTV applications
- IPTV accessibility
- Summary

Chapter 12 — IPTV Network Administration

- IPTV network management
- IPTV service support
- Network testing and monitoring
- Service redundancy and availability
- IP address management
- IPTV QoS management
- Subscriber experience monitoring
- Remote management of consumer devices
- Software update management
- IPTV troubleshooting
- Business continuity planning
- Summary
