

Contents :

Front Matter

- Preface
- List of Notation

Chapter 1 – Toward the Nanoscale

- Trends in miniaturization
- Nanotechnology and nanoelectronics
- Nanoscale dimensions and phenomena
- Future directions of nanoelectronic devices

Chapter 2 – Particles and Waves

- Introduction
- Classical particles
- Classical waves
- Wave-particle duality
- Closing remarks
- Problems

Chapter 3 – Wave Mechanics

- Introduction
- The Schrödinger wave equation
- Wave mechanics of particles
- Atoms and atomic orbitals
- Closing remarks
- Problems

Chapter 4 – Materials for Nanoelectronics

- Introduction
- Semiconductors
- Crystal lattices and bonding
- Electron energy bands
- Semiconductor heterostructures
- Lattice-matched and pseudomorphic heterostructures
- Organic semiconductors
- Carbon nanomaterials: nanotubes and fullerenes
- Closing remarks
- Problems

Chapter 5 – Growth, Fabrication, and Measurement Techniques for Nanostructures

- Introduction
- Bulk crystal and heterostructure growth
- Nanolithography and etching
- Fabrication of nanostructures and nanodevices
- Characterization techniques
- Self-assembled nanostructures
- Clusters and nanocrystals
- Nanotube growth methods
- Chemical and biological fabrication methods
- Fabrication of nanoelectromechanical systems (NEMS)
- Closing remarks
- Problems

Chapter 6 – Electron Transport in Semiconductors and Nanostructures

- Introduction
- Time and length scales of electrons
- Electron statistics
- Density of states in nanostructures
- Electron transport mechanisms
- Quantum transport phenomena
- Closing remarks
- Problems

Chapter 7 – Electrons in Traditional Low-Dimensional Structures

- Introduction
- Electrons in quantum wells
- Electrons in quantum wires
- Electrons in quantum dots
- Closing remarks
- Problems

Chapter 8 – Nanostructure Devices

- Introduction
- Resonant-tunneling diodes (RTDs)
- Field-effect transistors (FETs)
- Single-electron-transfer devices
- Potential-effect transistors
- Light-emitting diodes (LEDs) and lasers
- Nanoelectromechanical system devices
- Quantum-dot cellular automata (QCA)
- Closing remarks

Appendix

- Tables of Units
