Preface

Part I. Gettering and Metallic Impurities

1. Diffusion, Complexing and Precipitation of Transition Metals in Silicon — E. R. Weber

- **Assessment of Metallic Trace Contaminants on Silicon Wafer Surfaces — H. J. Rath, P. Stallhofer, D. Huber, P. Eichinger, I. Ruge**

Palladium-Test: A Tool to Evaluate Gettering Efficiency — K. Graff, H.-A. Hefner, H. Pieper

- **Gettering of Metallic Impurities in Silicon — A. Ourmazd, W. Schröter**

Low Temperature Interactions Between Gold and Iron in Silicon

Molybdenum Contamination in Silicon Epitaxial Layers and Substrates

- **Physical Modeling of Backside Gettering — G. B. Bronner, J. D. Plummer**
- **Intrinsic Gettering in Silicon**
- **Gettering and Precipitation Phenomena in Semiconductors — D. K. Sadana**

Part II. Impurity Diffusion

10. Stress-Assisted Diffusion of Boron and Arsenic in Silicon — M. L. Manda, M. Shepard, R. B. Fair, H. Z. Massoud

- **Pressure Dependence of Arsenic Diffusivity in Silicon — E. Nygren et al.**

Diffusion of Dopants in (111) Silicon During High Temperature Heat Treatment in Nitrogen — T. Kook, R. J. Jaccodine

Enhanced Carbon Diffusion in Silicon During 900°C Annealing — L. A. Ladd, J. P. Kalejs, U. Gösele

- **Diffusion of Boron from Polysilicon at High Concentrations — R. F. Lever et al.**

Effect of Pressure on Self-Diffusion in Crystalline Silicon — M. J. Aziz et al.

The Influence of Point Defects on Diffusion and Gettering in Silicon — U. Gösele, T. Y. Tan

- **Diffusion Mechanisms and Nonequilibrium Defects in Si — D. Mathiot, J. C. Pfister**

Investigation of Point Defects in Silicon by Impurity Diffusion — S. Mizuo, H. Higuchi

The Diffusion of Phosphorus in Silicon from High Surface Concentrations — H. F. Schaake

- **The Influence of Dislocations on the Diffusion Behavior of Gold in Silicon** — N. A. Stolwijk, J. Hölzl

Annealing and Diffusion of Boron in Self-Implanted Silicon by Furnace and Electron-Beam Heating — D. J. Godfrey et al.

Transient Enhanced Diffusion and Gettering of Dopants in Ion-Implanted Silicon — S. J. Pennycook, J. Narayan, R. J. Culbertson

Part III. Defects, Oxygen Precipitation and Silicon Processing

This section contains papers dealing with:

- Oxygen precipitation in silicon
- Vacancy and self-interstitial behavior
- Defect engineering
- Silicon crystal quality
- Internal (intrinsic) gettering
- External (extrinsic) gettering
- Semiconductor process contamination
- Device reliability and yield improvement
