

Sommaire - Biochimie

B.D. Hames, N.M. Hooper, J.D. Houghton

Section A – Structure cellulaire et imagerie

- A1. Prokaryote cell structure
- A2. Eukaryote cell structure
- A3. Cytoskeleton and molecular motors
- A4. Bioimaging
- A5. Cellular fractionation

Section B – Acides aminés et protéines

- B1. Amino acids
- B2. Acids and bases
- B3. Protein structure
- B4. Myoglobin and hemoglobin
- B5. Collagen
- B6. Protein purification
- B7. Electrophoresis of proteins
- B8. Protein sequencing and peptide synthesis

Section C – Enzymes

- C1. Introduction to enzymes
- C2. Thermodynamics
- C3. Enzyme kinetics
- C4. Enzyme inhibition
- C5. Regulation of enzyme activity

Section D – Anticorps

- D1. The immune system
- D2. Antibodies: an overview
- D3. Antibody synthesis
- D4. Antibodies as tools

Section E – Biomembranes et signalisation cellulaire

- E1. Membrane lipids
- E2. Membrane proteins and carbohydrates
- E3. Transport of small molecules
- E4. Transport of macromolecules
- E5. Signal transduction
- E6. Nerve function

Section F – Structure de l'ADN et réplication

- F1. DNA structure
- F2. Genes and chromosomes
- F3. DNA replication in bacteria
- F4. DNA replication in eukaryotes

Section G – Synthèse et traitement de l'ARN

- G1. RNA structure
- G2. Transcription in prokaryotes
- G3. Operons
- G4. Transcription in eukaryotes: an overview
- G5. Transcription of protein-coding genes in eukaryotes
- G6. Regulation of transcription by RNA Pol II
- G7. Processing of eukaryotic pre-mRNA
- G8. Ribosomal RNA
- G9. Transfer RNA

Section H – Synthèse protéique

- H1. The genetic code
- H2. Translation in prokaryotes
- H3. Translation in eukaryotes
- H4. Protein targeting
- H5. Protein glycosylation

Section I – Technologie de l'ADN recombinant

- I1. The DNA revolution
- I2. Restriction enzymes
- I3. Nucleic acid hybridization
- I4. DNA cloning
- I5. DNA sequencing
- I6. Polymerase chain reaction

Section J – Métabolisme des glucides

- J1. Monosaccharides and disaccharides
- J2. Polysaccharides and oligosaccharides
- J3. Glycolysis
- J4. Gluconeogenesis
- J5. Pentose phosphate pathway
- J6. Glycogen metabolism
- J7. Control of glycogen metabolism

Section K – Métabolisme des lipides

- K1. Structures and roles of fatty acids
- K2. Fatty acid breakdown
- K3. Fatty acid synthesis
- K4. Triacylglycerols
- K5. Cholesterol
- K6. Lipoproteins

Section L – Respiration et énergie

- L1. Citric acid cycle
- L2. Electron transport and oxidative phosphorylation
- L3. Photosynthesis

Section M – Métabolisme de l'azote

- M1. Nitrogen fixation and assimilation
- M2. Amino acid metabolism
- M3. The urea cycle
- M4. Hemes and chlorophylls

Annexes

- Further Reading / Bibliographie
- Index
