
CONTENTS

PREFACE	xi
1 INTRODUCTION	1
2 DESCRIPTIVE HYDROLOGY	9
<i>The hydrologic cycle, precipitation, streamflow, evaporation and transpiration, collecting hydrologic data</i>	
3 QUANTITATIVE HYDROLOGY	40
<i>Hydrograph analysis, estimating volume of runoff, runoff from snow, hydrographs of basin outflow, storage routing, computer simulation</i>	
4 GROUNDWATER	76
<i>Occurrence, groundwater hydraulics, wells, yield</i>	
5 PROBABILITY CONCEPTS IN PLANNING	110
<i>Flood frequency, flood formulas, rainfall frequency, drought, stochastic hydrology</i>	

6	WATER LAW	135
	<i>Common law, state water codes, groundwater law, federal law, interstate problems, drainage law</i>	
7	RESERVOIRS	147
	<i>Physical characteristics, yield, capacity, sedimentation, waves, reservoir clearance</i>	
8	DAMS	176
	<i>Forces on dams, gravity dams, arch dams, buttress dams, earth dams, miscellaneous types</i>	
9	SPILLWAYS, GATES, AND OUTLET WORKS	215
	<i>Spillways, crest gates, outlet works, protection against scour</i>	
10	OPEN CHANNELS	251
	<i>Hydraulics of open-channel flow, measurement of flow, types of channels, appurtenances</i>	
11	PRESSURE CONDUITS	278
	<i>Hydraulics of pressure conduits, measurement of flow, forces on pipes, pipe materials, appurtenances for pressure conduits, inverted siphons</i>	
12	HYDRAULIC MACHINERY	320
	<i>Turbines, centrifugal and axial-flow pumps, displacement pumps, miscellaneous pumps</i>	
13	ENGINEERING ECONOMY IN WATER-RESOURCES PLANNING	354
	<i>Social importance, annual-cost comparisons, interest and taxes, frequency and economy, economy studies for public works, cost allocation</i>	

14	IRRIGATION	374
	<i>Water requirements, soil-water relationships, water quality, irrigation methods, irrigation structures, legal aspects of irrigation</i>	
15	WATER SUPPLY SYSTEMS	402
	<i>Water uses and quantities, water characteristics and quality, treatment, distribution systems</i>	
16	HYDROELECTRIC POWER	467
	<i>Thermal versus water power, systems and load, project arrangement, electrical equipment, operation</i>	
17	RIVER NAVIGATION	485
	<i>Requirements of a navigable waterway, navigation dams, navigation locks</i>	
18	DRAINAGE	506
	<i>Estimates of flow, municipal storm drainage, land drainage, highway drainage, culverts and bridges</i>	
19	SEWERAGE AND WASTEWATER TREATMENT	545
	<i>Quantity of wastewater, characteristics of wastewater, collection and pumping, wastewater treatment, wastewater management</i>	
20	FLOOD-DAMAGE MITIGATION	631
	<i>The design flood, flood-mitigation reservoirs, levees and flood walls, floodways, channel improvement, evacuation and floodproofing, land management and flood mitigation, flood-plain management, economics of flood mitigation</i>	
21	PLANNING FOR WATER-RESOURCES DEVELOPMENT	660
	<i>Level, phases, objectives, data requirements, project formulation, environmental considerations, systems analysis, multiple-purpose projects</i>
