

Sommaire - Recombinant DNA. Part C Édité par Ray Wu, Lawrence Grossman et Kivie Moldave

Section I. Enzymes in Recombinant DNA Research

- DNA Joining Enzymes: A Review (N. Patrick Higgins & Nicholas R. Cozzarelli)
- Guide to the Use of Type II Restriction Endonucleases (Roy Fuchs & Robert Blakesley)
- Site-Specific Cleavage of DNA at 8-, 9-, and 10-bp Sequences (Michael McClelland)
- Exonuclease III: Use for DNA Sequence Analysis and in Specific Deletions of Nucleotides (Li-H E Guo & Ray Wu)

Section II. Methods for Isolation, Purification, or Amplification of DNA

- Gel Electrophoresis of Restriction Fragments (Edwin Southern)
- Purification, Specific Fragmentation, and Separation of Large DNA Molecules (Cassandra L. Smith & Charles R. Cantor)
- Orthogonal-Field-Alternation Gel Electrophoresis (Georges F. Carle & Maynard V. Olson)
- A Rapid Alkaline Extraction Method for the Isolation of Plasmid DNA (H.C. Birnboim)
- Specific Synthesis of DNA in Vitro via a Polymerase-Catalyzed Chain Reaction (Kary B. Mullis & Fred A. Faloona)

Section III. Vectors or Methods for Gene Cloning

- Escherichia coli Plasmids Packageable in Vitro in λ Bacteriophage Particles (John Collins)
- Production of Single-Stranded Plasmid DNA (Jeffrey Vieira & Joachim Messing)
- High-Efficiency Cloning of Full-Length cDNA (H. Okayama et al.)
- Transformation and Preservation of Competent Bacterial Cells by Freezing (D. A. Morrison)

Section IV. Vectors or Methods for Expression of Cloned Genes

- β -Galactosidase Gene Fusions for Analyzing Gene Expression (Malcolm J. Casadaban et al.)
- The Use of pKC30 and Its Derivatives for Controlled Expression of Genes (Martin Rosenberg et al.)

Section V. Methods for Oligonucleotide-Directed Mutagenesis

- Oligonucleotide-Directed Mutagenesis of DNA Fragments Cloned into M13 Vectors (Mark J. Zoller & Michael Smith)
- Oligonucleotide-Directed Construction of Mutations via Gapped Duplex DNA (Wilfried Kramer & Hans-Joachim Fritz)
- Rapid and Efficient Site-Specific Mutagenesis without Phenotypic Selection (Thomas A. Kunkel et al.)
- Mutagenesis with Degenerate Oligonucleotides (David E. Hill et al.)

Section VI. Miscellaneous Methods

- Fusogenic Reconstituted Sendai Virus Envelopes for Introducing DNA into Mammalian Cells (A. Vainstein et al.)
- In Vitro Transcription: Whole-Cell Extract (James L. Manley et al.)
- Translation of Exogenous mRNAs in Reticulocyte Lysates (William C. Merrick)
- Cell-Free Protein-Synthesizing System from Wheat Germ (Carl W. Anderson et al.)
- Direct Gene Transfer to Plant Protoplasts by Electroporation (Raymond D. Shillito & Ingo Potrykus)
- Rapid Single-Stranded Cloning and Sequencing Strategy (Roderic M. K. Dale & Amy Arrow)
- Hydroxyl Radical Footprinting: Mapping Protein-DNA Contacts (Thomas D. Tullius et al.)
