

Contents

CHAPTER 1 Introduction / 1

- Differences About Water Quality / 2
- Evolution of Water Quality Problems / 3
- The Era of Public Health Concern / 4
- The Environmental Movement / 5
- A Renewal of Health Concerns / 6
- Systems of Measurement / 6

CHAPTER 2 Some Important Characteristics of Water / 11

- Basic Physical Characteristics / 11
- Effects of Heating and Cooling / 13
- Chemical Characteristics / 17
- Water as a Solvent / 21
- Water as a Biological Fluid / 22
- Water as a Geological Tool / 23

CHAPTER 3 Some Concepts of Aquatic Biology / 27

- Some Factors that Affect Survival and Growth / 28
- The Ecological Niche and Food Web / 29
- Population Dynamics / 30
- Trophic Structure / 32
- Stream Characteristics and Effects on Aquatic Biology / 35
- Lake Characteristics and Effects on Aquatic Biology / 37
- Biological Impacts of Pollution / 40
- Biological Monitoring of Water Quality / 41

CHAPTER 4 Characteristics and Availability of Water Resources / 47

- Distribution of Water Resources Inventory / 47
- The Hydrologic Cycle / 49
- Evapotranspiration / 52
- Precipitation / 57
- Surface Runoff and Stream Flows / 64
- Groundwater / 69
- Overall Summary of U.S. Freshwater Resources / 73
- The Basic Nature of Water as a Resource / 76

CHAPTER 5 Water Uses / 81

- Beneficial Uses of Water / 81
- Water Carriage of Wastes / 83
- Potential for Reducing Water Carriage / 85
- Some Practical Environmental Implications / 86
- Competition in Use of Water / 88
- Complementary Aspects of Water Use / 90
- Optimization of Water Uses / 91
- Current U.S. Water Uses / 92
- Trends and Projections / 98
- Other Considerations / 100

CHAPTER 6 Methods of Evaluating Water Quality / 105

- The Concept of Water Quality / 106
- Systems for Measuring Water Quality / 107

Direct Measurements of Constituents /	107
Direct Measurements on Arbitrary Scales /	108
Measurements of Associated Factors /	109
Measurement of Effects of Constituents /	111
Qualitative Descriptions of Characteristics /	113
On Selecting Specific Analytical Methods /	113
Water Quality Criteria and Their Use /	115

CHAPTER 7 Constituents in Natural Waters / 123

Rain and Other Precipitation /	123
River Waters /	127
Lakes /	133
Groundwaters /	133
Oceans /	135
Other Waters /	136
Summary /	137

CHAPTER 8 Types and Causes of Water Quality Problems / 141

Nature of Water Pollution /	142
Potential Pollutants /	144
Infectious and Toxic Agents /	145
Oxygen-Demanding Substances /	147
Persistent Organic Chemicals /	148
Plant Nutrients /	150
Minerals and Chemicals Causing Specific Problems /	151
Suspended Matter /	151
Radioactive Substances /	153
Heat /	154
Sources of Pollutational Materials /	155
Evaluation of Stream Pollution /	160

CHAPTER 9 Water and Health / 165

Water as a Direct Vehicle for Disease Transmission /	166
Evaluating Risks for Waterborne Infectious Diseases /	174
Water as a Vector Habitat in Disease Transmission /	177

Water as a Vehicle for Transmitting Toxic Chemicals / 178
Beneficial Health Effects / 187
Past Trends and Future Problems / 190

CHAPTER 10 Oxygen Balance in Streams / 199

Biological Decomposition of Organics in Streams / 199
Oxygen Demand in Streams / 200
Measurement of Oxygen Demand / 203
Purposes of Oxygen Balance Models / 205
Deoxygenation of Water / 206
Oxygenation of Streams / 213
Practical Reaeration Models / 217
The Streeter-Phelps Formula / 219
Alternative Approaches / 222

CHAPTER 11 Municipal Water Systems / 227

Some Preliminary Considerations / 227
Roles of Water in Municipalities / 228
Municipal Water Uses and Variability / 230
Outline of Elements in Municipal Water Systems / 232
Selecting the Water Source / 233
Examples of Water Sources / 234
Water Quality as Related to Source / 237
Water Treatment / 239
Examples of Typical Water Treatment Systems / 241
Water Distribution Systems / 247
Treated Water Storage / 248
Some Health Implications in Distribution and Storage / 250

CHAPTER 12 Municipal Wastewater Systems / 255

Components of Municipal Wastewater Systems / 255
Municipal Wastewater Flows / 256
Wastewater Characteristics / 260
Wastewater Treatment Rationale and Systems / 267
Preliminary Treatment / 269
Primary Treatment / 272

Secondary Treatment /	274
Accomplishments and Limitations of Secondary Treatment /	282
Advanced Wastewater Treatment /	283
Adjunct Processes /	288

CHAPTER 13 Industrial Water and Wastewater / 295

Types of Industrial Operations Using Water /	295
Industrial Water Uses /	298
Industrial Water Quality Needs /	301
General Categories of Industrial Wastewaters /	303
Industrial Wastewater Flows and Characteristics /	305
Problems Caused by Industrial Wastewaters /	306
Effects in Municipal Sewerage Systems /	309

CHAPTER 14 Standards Used in Water Quality Control / 311

Water Quality Objectives /	312
Water Quality Criteria /	312
Water Quality Standards /	313
Basic Types of Standards /	314
Design Standards /	315
Performance Standards /	316
Procedural Standards /	318
Comparison of Design and Performance Standards /	319

CHAPTER 15 Regulation of Water Quality / 325

The Legal Structure for Water Quality Control /	325
Rationale for Water Pollution Control Programs /	327
Development of a Data Base /	328
Establishing Optimum Beneficial Uses /	330
Stream Classification Systems /	331
Setting Water Quality Standards for Streams /	335
Technology-Based Effluent Standards /	336
Effluent Standards for Water Quality-Limited Streams /	337
Flexibility in Standards /	337
Violations of NPDES Standards /	339

CHAPTER 16 Progress, Problems, and Prospects / 345

- Water Quality Evaluation / 346
- Water Supplies / 350
- Wastewater Disposal / 353
- Regulation of Water Quality / 355

APPENDIX Units, Conversions, and Other
Calculations / 359

- Some Elements of the SI System / 359
- SI and English Units Encountered in Practice / 360
- Basic Conversion Factors / 362
- Examples of Conversion Calculations / 366
- Other Water Quality Calculations / 367

INDEX / 369
