

Sommaire

- **Getting Started with C#**
- **Data Types and Operators**
- **Control Statements, Arrays and Functions**
- **Introduction to Classes and Inheritance**
- **Namespaces and Interfaces**
- **Delegates and Events**
- **Attributes, Structures and Enums**
- **Exception Handling**
- **Multithreading**
- **Properties and Indexers**
- **Streams and Files**
- **String Handling**
- **Using Collections**
- **Components, Cross-Language Interoperability and Versioning**
- **Operator Overloading and Unsafe Code (Pointers)**
- **Networking in C#**
- **Database Connectivity Using ADO.NET**
- **Window Programming (Windows Forms)**
- **Graphical Device Interface (GDI+).**
- **Web Services**
- **Garbage Collection**
- **XML in C#**
- **Introduction to Assemblies**

- **XML Documentation in C#**
- **Security Features in .NET and C#**
