

# Table of Contents

## 1. Voltage, Current and Resistance

- Basic notions
- Waveforms
- Ohm's Law
- Diodes
- Kirchhoff's Laws
- Node voltages
- Superposition

## 2. Thevenin and Norton

- Thevenin's theorem
- Norton's theorem
- Current sources
- Equivalent circuits
- Matching and systems

## 3. Capacitance

- Charge and capacitance
- Energy storage
- Capacitors (series & parallel)
- CR transients
- Integration and differentiation

## 4. Alternating Current (AC); Bandwidth

- RMS values
- Phase relationships
- Filters
- Power factor
- Noise and bandwidth

## 5. Inductance

- Faraday's law
- Self-inductance
- LR transients
- Energy storage
- AC response

## **6. Complex Numbers: Impedance**

- Complex numbers
- AC analysis
- Impedance in circuits
- Power and bridges

## **7. Operational Amplifiers and Negative Feedback**

- Feedback principles
- Differential amplifier
- Gain-bandwidth
- Oscillation
- Impedance effects

## **8. Integration and Differentiation**

- Integrators
- Differentiators
- Miller effect
- Compensation

## **9. The Diode and the Bipolar Transistor**

- Semiconductors and doping
- pn junction diode
- Transistor operation
- Amplification and biasing

## **10. The Field Effect Transistor (FET)**

- FET operation
- MOSFETs
- CMOS technology
- Fabrication

## **11. Equivalent Circuits for Diodes and Transistors**

- Small-signal models
- Hybrid- $\pi$  model
- Common emitter amplifier
- Emitter follower

## **12. Gates (Digital Logic)**

- Boolean algebra
- Logic gates (AND, OR, NOT, NAND, NOR)
- Karnaugh maps
- Decoders, encoders, multiplexers

### **13. Sequential Logic**

- Flip-flops (RS, JK)
- Counters
- State diagrams
- Pulse generators

### **14. Resonance and Ringing**

- LCR circuits
- Transients
- Poles and zeros

### **15. Fourier's Theorem**

- Fourier series
- Fourier transforms
- Signal analysis
- Modulation and multiplexing

### **16. Transformers and Three-Phase Supplies**

- Transformer principles
- Equivalent circuits
- Three-phase systems

### **Appendices**

- Appendix A: Thevenin's Theorem
- Appendix B: Exponentials

### **Index**
