List of Figures	vii
List of Tables	xi
Preface	xiii
<b>1. INTRODUCTION</b>	<b>1</b>
1.1 Overview	1
1.2 Discrete Fourier Transform	2
1.3 Chirp z-transform	4
1.4 Subband Discrete Fourier Transform	6
1.5 Computation of Nonuniformly Spaced Frequency Samples	8
1.6 Summary	8
<b>2. THE NONUNIFORM DISCRETE FOURIER TRANSFORM</b>	<b>11</b>
2.1 Basic Concepts	11
2.2 Properties of the NDFT	19
2.3 Computation of the NDFT	29
2.4 Subband NDFT	35
2.5 The 2-D NDFT	40
2.6 Summary	45
<b>3. 1-D FIR FILTER DESIGN USING THE NDFT</b>	<b>47</b>
3.1 Introduction	47
3.2 Existing Methods for Frequency Sampling Design	48
3.3 Proposed Nonuniform Frequency Sampling Design	49
3.4 Results	78
3.5 Summary	94
<b>4. 2-D FIR FILTER DESIGN USING THE NDFT</b>	<b>97</b>
4.1 Introduction	97
4.2 Existing Methods for 2-D Frequency Sampling	98
4.3 Proposed 2-D Nonuniform Frequency Sampling Design	100
4.4 Square Filter Design	101

4.5	Circularly Symmetric Filter Design	106
4.6	Diamond Filter Design	115
4.7	Elliptically-Shaped Lowpass Filter Design	132
4.8	Applications of 2-D Filters	142
4.9	Summary	144
5.	ANTENNA PATTERN SYNTHESIS WITH PRESCRIBED NULLS	151
5.1	Introduction	151
5.2	Existing Methods for Null Synthesis	152
5.3	Proposed Null Synthesis Method	154
5.4	Design Examples and Comparisons	159
5.5	Summary	171
6.	DUAL-TONE MULTI-FREQUENCY SIGNAL DECODING	173
6.1	Introduction	173
6.2	Background	174
6.3	Proposed DTMF Decoding Algorithm Using the Subband NDFT	178
6.4	Results and Comparisons	181
6.5	Summary	196
7.	CONCLUSIONS	197
	References	201
	Index	207
