

# Table des matières

1. **Al-Khorezmi : son histoire, sa personnalité, ses travaux et son influence**
2. **Algorithms in Modern Mathematics and Computer Science**
3. **What Are the Gains of the Theory of Algorithms?**
4. **On Inductive Synthesis of Programs**
5. **Expanding Constructive Universes**
6. **The Logical Approach to Programming**
7. **The Structural Synthesis of Programs**
8. **On Finding Invariant Relations of Programs**
9. **What Can We Do with Problems of Exhaustive Search?**
10. **The Algorithmic Complexity of Linear Algebras**
11. **Algorithms in Various Contexts**
12. **Role of a Notion of Algorithm in the Arithmetic Language Semantics**
13. **From Logicism to Proceduralism (An Autobiographical Account)**
14. **Abstract Computability on Algebraic Structures**
15. **Algorithms and Algebra**
16. **On Formal Transformations of Algorithms**
17. **What Should We Do Having Proved a Decision Problem to Be Unsolvable?**
18. **On the Experience of Riding Two Horses in Programming**
19. **Church-Rosser Transformers and Decidable Properties of Tree Processing**
20. **Résumé des présentations orales**
21. **Programme technique du symposium**
22. **Publications du symposium**
23. **Liste des participants**
24. **Illustrations et photos**
