

Table of Contents :

Part 1 — Fundamentals of Internal Combustion Engines

1. Introduction to Internal Combustion Engines
2. Engine Classification
3. Terminology and Basic Parameters
4. Theoretical Engine Cycles
5. Otto, Diesel, and Dual Cycles

Part 2 — Thermodynamics of Engines

6. Thermodynamic Analysis of Cycles
7. Real Cycles and Energy Losses
8. Thermal Efficiency of Engines
9. Heat Transfer in Engines

Part 3 — Combustion and Fuels

10. Combustion Theory
11. Combustion in Spark-Ignition (SI) Engines
12. Combustion in Compression-Ignition (CI) Engines
13. Liquid and Gaseous Fuels
14. Alternative Fuels and Biofuels

Part 4 — Engine Components and Architecture

15. General Engine Layout
16. Cylinder, Piston, and Rings
17. Connecting Rod and Crankshaft
18. Cylinder Head and Combustion Chamber
19. Valves and Valve Mechanism

Part 5 — Fuel and Air Systems

20. Air-Fuel Mixture Formation
21. Carburetion
22. Gasoline Injection
23. Diesel Injection
24. Intake and Exhaust Systems
25. Supercharging and Turbocharging

Part 6 — Auxiliary Systems

26. Engine Lubrication
27. Air- and Liquid-Cooling Systems

- 28. Ignition Systems
- 29. Starting Systems and Electrical Equipment

Part 7 — Engine Performance

- 30. Power and Torque
- 31. Fuel Consumption
- 32. Volumetric Efficiency
- 33. Engine Testing and Performance Characteristics
- 34. Balancing and Vibrations

Part 8 — Pollution and Emission Control

- 35. Formation of Pollutants
- 36. Emissions from Spark-Ignition Engines
- 37. Emissions from Diesel Engines
- 38. Emission Control Technologies
- 39. Environmental Standards

Part 9 — Special Engines and Modern Technologies

- 40. Two-Stroke Engines
- 41. Four-Stroke Engines
- 42. Rotary (Wankel) Engines
- 43. Gas Engines
- 44. Hybrid and Advanced Engine Technologies

Part 10 — Industrial and Automotive Applications

- 45. Automotive Engines
- 46. Marine Engines
- 47. Aircraft Piston Engines
- 48. Stationary Industrial Engines
- 49. Engine Maintenance and Diagnostics
