

CONTENTS

Preface

CHAPTER 1	INTRODUCTION	1
1.1	Overview / 1	
1.2	The Materials Spectrum / 2	
1.3	What are Electronic Ceramics? / 4	
1.3.1	Crystal Compounds / 4	
1.3.2	High Temperature Processing / 5	
1.3.3	Crystals and Glasses / 5	
1.4	Structure of Crystal Compounds / 6	
1.4.1	Structure Rules / 6	
1.4.2	Radius Ratio Concept / 6	
1.4.3	Electrical Neutrality / 8	
1.4.4	Ionic Bonding / 14	
1.5	Thermal Expansion / 17	
1.6	Glass / 19	
1.7	Processing and Microstructures / 20	
1.8	Range of Electronic Properties / 27	
1.9	Electronic Ceramics Market / 29	
	Problems / 30	
	Reading List / 31	

CHAPTER 2 QUANTUM MECHANICS AND THE BAND THEORY OF SOLIDS 33

- 2.1 General Applications of Quantum Mechanics / 33
- 2.2 Postulate the Five Rules of Quantum Mechanics / 36
- 2.3 De Broglie's Wavelength / 38
- 2.4 Electron Scattering / 39
- 2.5 Simple Harmonic Oscillator (SHO) / 40
- 2.6 Probability / 42
- 2.7 Superposition / 43
- 2.8 Heisenberg Uncertainty / 44
- 2.9 Quantization of Wavefunctions and Energies / 45
- 2.10 Probability of Locating a Particle / 47
- 2.11 Bohr Model of the Hydrogen Atom / 51
- 2.12 Quantum Numbers / 54
- 2.13 Molecular Orbitals / 55
- 2.14 *Ab-initio* Calculations / 57
- 2.15 Semi-Empirical Calculations / 58
- 2.16 Huckel Molecular Orbital Theory / 59
- 2.17 Band Theory of Solids / 64
- 2.18 Silicon Carbide High-Band-Gap Semiconductor / 69
 - Problems / 71
 - Reading List / 73

CHAPTER 3 SEMICONDUCTORS 74

- 3.1 Introduction / 74
- 3.2 Theory of Superposition / 75
- 3.3 Hall Effect / 81
- 3.4 Electronic Conductivity / 83
- 3.5 Boltzmann Energy Distribution / 84
- 3.6 Fermi-Dirac Distribution / 86
- 3.7 Fermi Level / 90
- 3.8 Extrinsic Semiconduction / 93
- 3.9 Concentration of Carriers / 96
- 3.10 Polarons / 96
- 3.11 Excitons / 96
- 3.12 Semiconductor Surfaces / 97
- 3.13 Semiconductor Contacts / 99
- 3.14 P-N Junctions / 104
- 3.15 Diodes / 105
- 3.16 Junction Transistor / 109
- 3.17 Gallium Arsenide / 111
- 3.18 Silicon Carbide Semiconductors / 112
- 3.19 Amorphous Semiconductors / 117

- 3.20 Radial Distribution Function / 120
- 3.21 Amorphous Germanium / 121
- 3.22 One-Dimensional Model / 121
- 3.23 Transport / 124
- 3.24 Materials / 130
 - Problems / 133
 - Reading List / 134

CHAPTER 4 IONIC AND DEFECT CONDUCTORS 136

- 4.1 Introduction / 136
- 4.2 Theory of Ionic Conductivity / 139
- 4.3 Ionic Conductivity / 144
 - 4.3.1 Electrode Polarization / 144
 - 4.3.2 Glass Composition and Structure Effects / 147
 - 4.3.3 Molten Silicates / 150
- 4.4 Solid Electrolytes and Fast Ion Conductors / 154
- 4.5 Criterion for Fast Ion Conduction / 157
- 4.6 β -Alumina and β'' -Alumina / 159
- 4.7 Grain Boundary Effects / 163
- 4.8 Defect Semiconductors / 163
- 4.9 Frenkel Disorder in a Stoichiometric Crystal / 165
- 4.10 Example of a Defect Semiconductor: Lead Sulfide / 174
- 4.11 Protonic Conduction in Glasses / 180
 - Problems / 183
 - Reading List / 184

CHAPTER 5 LINEAR DIELECTRICS 185

- 5.1 Importance / 185
- 5.2 Theory / 185
- 5.3 Circuit Description of a Linear Dielectric / 191
- 5.4 Relation of Dielectric Constant to Polarization / 193
- 5.5 Dipolar Polarization Theory / 195
- 5.6 Time Dependence of Dipolar Polarization / 198
- 5.7 Cole-Cole Distributions / 203
- 5.8 Temperature Dependence of Dipolar Polarization / 205
- 5.9 Interfacial Polarization / 208
- 5.10 Composition and Structural Effects of Glasses / 212
- 5.11 Sol-Gel Silica Dielectric Spectra / 216
- 5.12 Dielectric Breakdown / 222
- 5.13 Intrinsic Breakdown Mechanisms / 224

- 5.14 Thermal Breakdown Mechanics / 227
- 5.15 Avalanche Breakdown Mechanisms / 229
- 5.16 Experimental Variables / 231
- Problems / 233
- Reading List / 235

CHAPTER 6 NONLINEAR DIELECTRICS

237

- 6.1 Introduction / 237
- 6.2 Crystallographic Considerations / 237
- 6.3 Ferroelectric Theory / 240
- 6.4 Structural Origin of the Ferroelectric State / 244
- 6.5 Hysteresis / 250
- 6.6 Description of Ferroelectricity Based on Local Fields / 252
- 6.7 Effect of Temperature on Polarizability / 259
- 6.8 Ferroelectric Domains / 259
- 6.9 Effects of Environment on Switching and Transitions / 266
- 6.10 Effect of an Electric Field on T_c / 267
- 6.11 Compositional Factors / 270
- 6.12 Effect of Grain Size on Ferroelectric Behavior / 272
- 6.13 Antiferroelectric-Ferroelectric Transition / 272
- 6.14 PLZT Ceramics / 276
- Problems / 278
- Reading List / 280

CHAPTER 7 MAGNETIC CERAMICS

282

- 7.1 Introduction / 282
- 7.2 Basic Theory / 282
- 7.3 Diamagnetism / 289
- 7.4 Paramagnetism / 291
- 7.5 Ferromagnetism / 292
- 7.6 Antiferromagnetism / 295
- 7.7 Ferrimagnetism / 296
- 7.8 Exchange and Indirect Exchange Interactions / 297
- 7.9 Spin Order / 303
- 7.10 Lattice Interactions / 304
- 7.11 Ferrimagnetic and Ferromagnetic Domains and Domain Motion / 305
- 7.12 Classes of Magnetic Ceramics / 309
- 7.13 Spinel Ferrites / 311
- 7.14 Fe_3O_4 / 313
- 7.15 Structure of Spinel Ferrites / 315

7.16	Spinel Lattice Interactions /	314
7.17	Effect of Composition in Ferrites /	315
7.18	Effect of Thermal Treatment /	316
7.19	Oxidation States /	317
7.20	Manganese and Nickel Zinc Ferrites /	317
7.21	Hexagonal Ferrites /	321
7.22	Garnet Ferrites /	327
	Problems /	333
	Reading List /	334

CHAPTER 8 PHOTONIC CERAMICS 335

8.1	Introduction /	335
8.2	Radiation /	337
8.3	Reflection /	338
8.4	Refraction /	341
8.5	Scattering /	351
8.6	Absorption /	352
8.7	Absorption in the Visible /	358
8.8	Ions in Ligand Fields /	358
8.9	Intraionic Absorption and Ligand Field Theory /	359
8.10	Optical Filters /	376
8.11	Polarization /	378
8.12	Ionic Polarizability /	385
	Problems /	389
	Reading List /	391

CHAPTER 9 OPTICAL WAVEGUIDES 392

9.1	Introduction /	392
9.2	Optical Fibers /	393
9.3	Generations of Optical Communications /	395
9.4	Hollow Conducting Waveguides /	396
9.5	TEM Waves in a Metallic Waveguide /	402
9.6	Hollow Rectangular Waveguide for a <i>TE</i> Wave ($E_{oz} = 0$) /	407
9.7	Refraction and Reflection /	410
9.8	Reflectance /	418
9.9	Dielectric Waveguides /	419
9.10	Goos-Haenchen Shift /	420
9.11	Graded-Index Waveguides /	420
9.12	Ray Deviations from Central Core /	422
9.13	Planar Waveguides /	425
9.14	Laser Fabrication of Gel-Silica Waveguides /	426

9.15 Application of the Fresnel Equations / 427
 9.16 Infrared Waveguides / 429
 9.17 Waveguide Integrated Optics / 429
 Problems / 432
 Reading List / 433

CHAPTER 10 ELECTRO-OPTICAL CERAMICS

434

10.1 Introduction / 434
 10.2 Birefringence / 434
 10.3 Optical Principal Axis / 436
 10.4 Isometric Optical Indicatrix / 437
 10.5 Uniaxial Optical Indicatrix / 437
 10.6 Biaxial Optical Indicatrix / 438
 10.7 Electric Field Dependence of Index of Refraction / 439
 10.8 Pockels (Linear) Effect / 440
 10.9 Kerr (Quadratic) Effect / 440
 10.10 Optical Activity / 441
 10.11 Faraday Effect / 441
 10.12 Materials / 442
 10.13 Memory Effect / 447
 10.14 Parametric Amplification Oscillation / 448
 10.15 Fluorescence / 449
 10.16 Light Emitting Diodes (LED) / 451
 10.17 Blue Light Emitting Diodes / 452
 10.18 Avalanche Photodiodes (APDs) / 454
 10.19 Excitons / 455
 10.20 Quantum Confinement / 457
 10.21 Photoconductive Semiconductors / 459
 10.22 Nonlinear Optics / 460
 Problems / 461
 Reading List / 462

CHAPTER 11 GLASS AND CRYSTALLINE LASERS

463

11.1 Introduction / 463
 11.2 Optical Cavities: Feedback and Lasers / 464
 11.3 Metastable States and Stimulated Emission / 467
 11.4 Three Level Lasers (Cr—Al₂O₃) / 468
 11.5 Four Level Lasers (Nd-YAG, Nd-Glass) / 470
 11.6 Emission Cross Section / 476
 11.7 Laser Modes and Focusing / 477
 11.8 Etalons: Fabry-Perot Interferometer / 479
 11.9 Brewster Angle Windows / 485

- 11.10 Q-Switching / 485
- 11.11 GaAs Lasers / 485
- 11.12 Quantum Well Lasers / 487
- 11.13 Limitations in Laser Power / 487
- 11.14 Fluorescence Lifetimes / 488
- 11.15 Parameters of Various Lasers / 490
 - Problems / 491
 - Reading List / 492

CHAPTER 12 CERAMIC SUPERCONDUCTORS 493

- 12.1 High-Temperature Superconducting Ceramics / 493
- 12.2 Background / 495
- 12.3 Meissner Effect / 496
- 12.4 The Critical Field / 498
- 12.5 Early Theories on Superconductivity / 498
- 12.6 The BCS Theory / 499
- 12.7 Electron Pairs / 499
- 12.8 Energy of the Cooper Pair / 504
- 12.9 The Isotope Effect / 505
- 12.10 Debye Theory of Specific Heat / 507
- 12.11 BCS Phonon–Electron Coupling / 508
- 12.12 Type I Superconductors / 508
- 12.13 Magnetic Field Penetration Depth / 510
- 12.14 Type II Superconductors / 513
- 12.15 Structure of High T_c Superconducting Ceramics / 515
- 12.16 High- T_c Electron Pairs and Coupling Mechanisms / 516
- 12.17 Resonating Valence Bonds / 517
- 12.18 Spin Bag Model / 517
- 12.19 Phase Diagrams of High- T_c Superconducting Ceramics / 518
- 12.20 Crystalline Structure / 521
- 12.21 Defect Chemistry of Superconducting Ceramics / 523
- 12.22 Conclusions / 525
 - Problems / 526
 - Reading List / 528

APPENDIX I 537

INDEX 539
