

Table of Contents

Chapter 1 – Turbines

- 1.1. Thermodynamics and Steam Turbine Theory
- 1.2. The Steam Turbine Cycle
- 1.3. Nozzles and Steam Expansion
- 1.4. Moving Blades and Stage Efficiency
- 1.5. Turbine Performance and Specific Steam Consumption
- 1.6. Types of Steam Turbines
- 1.7. Turbine Flow and Heat Supply Arrangements
- 1.8. Turbine Cylinder Construction
- 1.9. Turbine Rotors and Shafts
- 1.10. Bearings and Thrust Bearings
- 1.11. Gas Turbines
- 1.12. Hydraulic Turbines

Chapter 2 – Turbine Auxiliary Systems

- 2.1. Introduction to Turbine Auxiliary Equipment
- 2.2. Gland and Sealing Systems
- 2.3. Lubrication Systems
- 2.4. Lubricating Oil Equipment
- 2.5. Governors and Governing Gear
- 2.6. Turbine Control and Protection
- 2.7. Steam Valves and Stop Valves
- 2.8. Turbine Safety Systems

Chapter 3 – Feedwater Heating Systems

- 3.1. Principles of Feedwater Heating
- 3.2. Feedwater Heaters
- 3.3. Feed Heater Arrangements
- 3.4. Regenerative Feedwater Heating
- 3.5. Extraction Steam Systems
- 3.6. Deaerators
- 3.7. Feedwater Pumps
- 3.8. Regenerative Cycle Calculations

Chapter 4 – Condenser and Cooling Water Plant

- 4.1. Steam Condensation
- 4.2. Surface Condensers
- 4.3. Condenser Design and Construction
- 4.4. Condenser Tubes and Tube Plates
- 4.5. Cooling Water Systems
- 4.6. Circulating Water Pumps
- 4.7. Cooling Towers and Cooling Equipment
- 4.8. Condenser Vacuum Systems
- 4.9. Condenser Performance and Maintenance

Chapter 5 – Miscellaneous Station Services, Pipework and Plant

- 5.1. Station Water Services
- 5.2. Compressed Air Services
- 5.3. Heating and Ventilation Systems
- 5.4. Plant Pipework
- 5.5. Valves and Pipe Fittings
- 5.6. Drainage and Blowdown Systems
- 5.7. Cranes and Lifting Equipment
- 5.8. Miscellaneous Mechanical Services
- 5.9. Maintenance and Safety Considerations
