

Contents :

Part I — Curves and Codes

1. **On (or in) the Blahut Footprint** — Tom Høholdt
2. **The Klein Quartic, the Fano Plane and Curves Representing Designs** — Ruud Pellikaan
3. **Improved Hermitian-like Codes over $GF(4)$** — Gui-Liang Feng, T. R. N. Rao
4. **The BM Algorithm and the BMS Algorithm** — Shojiro Sakata
5. **Lee Weights of Codes from Elliptic Curves** — José Felipe Voloch, Judy L. Walker
6. **Curves, Codes and Cryptography** — Ian F. Blake

Part II — Codes and Signals

7. **Transforms and Groups** — G. David Forney Jr.
8. **Spherical Codes Generated from Self-Dual Association Schemes** — Thomas Ericson
9. **Codes and Ciphers: Fourier and Blahut** — James L. Massey
10. **Bounds on Constrained Codes in One and Two Dimensions** — Jørn Justesen
11. **Classification of Certain Tail-Biting Generators for the Binary Golay Code** — A. Robert Calderbank, G. David Forney Jr., Alexander Vardy
12. **On the Weight Distribution of Some Turbo-Like Codes** — Daniel J. Costello Jr., Jiali He

Part III — Signals and Information

13. **Alternating Minimization Algorithms: From Blahut-Arimoto to Expectation-Maximization** — Joseph A. O'Sullivan
14. **Information-Theoretic Reflections on PCM Voiceband Modems** — Gottfried Ungerboeck
15. **Some Wireless Networking Problems with a Theoretical Conscience** — Anthony Ephremides
16. **Bounds on the Efficiency of Two-Stage Group Testing** — Toby Berger, James W. Mandell
17. **Computational Imaging** — David C. Munson Jr.
