

Contents :

1. **Introduction to automatic process control**
 - Basic concepts of automatic control
 - Process-control systems
 - Control loops
 - Automatic versus manual control
2. **Process-control concepts**
 - Controlled processes
 - Process variables
 - Feedback and control action
 - Basic control-system configurations
3. **Process measurements**
 - Measurement principles
 - Theory of measurement
 - Measurement techniques
 - Measurement of industrial process variables
4. **Sensors and transducers**
 - Measurement devices
 - Sensor outputs
 - Transducers
 - Conversion of physical variables into electrical signals
5. **Signal conditioning**
 - Amplification
 - Signal conversion
 - Filtering
 - Conditioning of measurement signals
 - Transmission of process signals
6. **Process controllers**
 - Controller functions
 - Open-loop and closed-loop control
 - Proportional control
 - Integral control
 - Derivative control
 - PID control
 - Analog and digital control
7. **Controller hardware**
 - Analog controllers
 - Digital controllers
 - Controller implementation
 - Control-system hardware
8. **Computers in process control**
 - Digital computers as process controllers
 - Computer/process interfaces
 - Input/output systems
 - Data acquisition
 - Computer processing of process information
 - Digital process-control system design
 - Programming considerations
9. **Actuators and final control elements**
 - Electromechanical actuators

- Linear and rotary motion
- Solenoids
- DC motors
- AC motors
- Stepper motors
- Final control devices

10. Process-control operator interface

- Operator interaction with control systems
- Displays and controls
- Process information
- Human interaction with automated systems

11. Robotics

- Fundamentals of robots
- Robots in process-control systems
- Degrees of freedom
- Robot sensing
- Robot classifications
- Industrial applications

12. Troubleshooting process-control systems

- System failures
- Preliminary troubleshooting procedures
- Diagnostic aids
- Fault identification and correction

13. Appendices and index
