<b>Preface</b> .....	7
<b>Introduction</b> .....	9
<b>Part One Systems Analysis of Unit Operations and Processes in Chemical Engineering. Environmental Aspects</b>	
<b>1 General Principles</b> .....	18
<b>2 Fluid-Dynamic Operations in Wasteless Manufacturing</b> .....	39
2-1 Separation by Gravity.....	41
2-2 Separation by Centrifugal Forces.....	49
2-3 Filtration.....	53
<b>3 Operations and Process Units Based on Heat Transfer</b> .....	57
3-1 Effect of Actual Flow Situation in Heat Exchangers.....	59
3-2 Optimal Load Sharing Among Heat Exchangers.....	63
3-3 Synthesis of Heat Exchange and Recovery Systems.....	66
<b>4 Operations and Process Units Based on Mass Transfer</b> .....	71
4-1 General.....	71
4-2 Optimal Load Sharing Among Absorbers in Parallel.....	77
4-3 Wastewater Treatment by Adsorption.....	82
<b>5 Chemical Conversions</b> .....	86
5-1 General.....	86
5-2 Load Sharing Among Reactors.....	98
5-3 Recycling in Chemical Conversion.....	109
5-4 Chemical Treatment of Liquid, Gaseous and Solid Waste.....	117
<b>6 Biochemical Processes</b> .....	125
6-1 General.....	125
6-2 Transformations of Organic Substances.....	133
6-3 Transformations of Nitrogen Compounds.....	138
6-4 Transformations of Phosphorus Compounds.....	139
6-5 Biochemical Treatment of Waste Water.....	141

## Part Two Large Chemical Engineering Systems

### 7 Analysis, Synthesis and Optimization of Large Systems.....

7-1 General.....	148
7-2 Optimization of Chemical Engineering Systems and Utilization of Secondary Material Resources.....	148
	154

## Part Three Manufacture of Basic Inorganic and Organic Products. Environmental Aspects

### 8 Manufacture of Basic Inorganic Products and Environmental Aspects.....

8-1 Ammonia.....	173
8-2 Nitric Acid.....	173
8-3 Sulphuric Acid.....	182
8-4 Phosphoric Acid.....	188
8-5 Fertilizers.....	192
8-6 Caustic and Chlorine.....	198
8-7 Soda Ash.....	214
	218

### 9 Manufacture of Key Organic Products. Environmental Aspects.....

9-1 Dichloroethane.....	221
9-2 Methanol.....	222
9-3 Formaldehyde.....	223
9-4 Styrene.....	225
9-5 Ethylbenzene.....	226
9-6 Vinyl Chloride.....	227
9-7 Ethylene Oxide.....	230
9-8 Ethylene Glycol.....	231
9-9 Cumene.....	232
9-10 Acetic Acid.....	232
9-11 Xylenes.....	233
9-12 Phenol.....	234
9-13 Cyclohexane.....	235
9-14 Acetone.....	236
9-15 Acetic Anhydride.....	237
9-16 Vinyl Acetate.....	237
9-17 Carbon Tetrachloride.....	238
9-18 Plastics and Synthetic Resins.....	239
	241

**Conclusion.....** 242

**References.....** 247

**Index.....**
