

# CONTENTS

Preface xiii

<b>Chapter 1 PROPERTIES OF ROCKS AND SOILS . . . . .</b>	<b>1</b>
<b>1.1 Rock Formations</b>	<b>1</b>
<b>1.2 Soil Formations</b>	<b>6</b>
<b>1.3 Soil Properties</b>	<b>7</b>
<b>Soil Identification and Basic Tests</b>	<b>8</b>
<b>1.4 Volume-Weight Relationships</b>	<b>15</b>
<b>1.5 Clay Minerals</b>	<b>21</b>
<b>1.6 Soil Classification Systems</b>	<b>24</b>
<b>Textural Systems</b>	<b>24</b>
<b>Unified Classification System</b>	<b>25</b>
<b>Pedologic Classification System</b>	<b>29</b>
<b>Problems and Discussion Questions</b>	<b>30</b>
<b>References</b>	<b>32</b>
<b>Chapter 2 WATER-BEARING FORMATIONS AND GROUNDWATER OCCURRENCE . . . . .</b>	<b>33</b>
<b>2.1 Water-Bearing Formations</b>	<b>34</b>
<b>Aquifers</b>	<b>35</b>
<b>Aquicludes and Aquitards</b>	<b>37</b>
<b>Confined and Unconfined Aquifers</b>	<b>38</b>
<b>2.2 Groundwater Occurrence</b>	<b>41</b>
<b>Groundwater Origin and the Hydrologic Cycle</b>	<b>41</b>
<b>Modes of Groundwater Occurrence</b>	<b>45</b>
<b>2.3 Groundwater Quality</b>	<b>47</b>
<b>Precipitation Effects</b>	<b>48</b>
<b>Effects of Soils and Rocks</b>	<b>49</b>
<b>Hardness of Groundwater</b>	<b>58</b>

Dissolved Gases	60
Causes and Effects of Changes in Groundwater Quality	61
Physical Properties of Groundwater	62
Chemical and Biological Testing	63
Radionuclides in Groundwater	65
Water-Quality Criteria	67
Problems and Discussion Questions	75
References	77
<b>Chapter 3 FUNDAMENTALS OF GROUNDWATER FLOW . . . . .</b>	<b>81</b>
3.1 Permeability	82
3.2 General States of Flow	83
Laminar and Turbulent Flow	83
Steady and Transient Flow	84
3.3 Darcy's Law	85
Factors Affecting Hydraulic Conductivity	86
Range of Validity of Darcy's Law	90
3.4 Laboratory Permeability Tests	91
Constant-Head Permeameters	91
Falling-Head Permeameters	93
Consolidation Tests	94
3.5 Hydraulic Heads	96
3.6 Generalization of Darcy's Law	98
3.7 Effects of Soil Stratification on Hydraulic Conductivity	99
3.8 Flow Configuration	100
3.9 Effective Stresses	105
3.10 Quicksand and the Design of Filters	108
3.11 Analysis of Hydraulic Forces	116
Case I: Hydrostatic Conditions	116
Case II: Upward Flow	116
Case III: Downward Flow	117
Problems and Discussion Questions	118
References	120
<b>Chapter 4 EVOLUTION OF GROUNDWATER ENGINEERING . . . . .</b>	<b>122</b>
4.1 Historical Notes	123
Origin of Groundwater	123
Groundwater Utilization	126
4.2 Seepage and Groundwater Hydrology	128
4.3 Recent Advances in Groundwater Engineering	130
Water Demand	131
Control of Groundwater Withdrawal	133
Water Pollution	134
Regional Investigations	136
Legals Aspects	136
4.4 Groundwater Data and Literature	138
U.S. Geological Survey Publications	138
Government Publications	138
University Publications	139

Problems and Discussion Questions	239
References	241
<b>Chapter 7 MANAGEMENT OF GROUNDWATER . . . . .</b>	<b>243</b>
7.1 Technical Procedures of Basin Management	245
7.2 Planning Groundwater Investigations	246
7.3 Water Budget of Groundwater Basins	251
7.4 Basin Yield	255
Safe Yield (or Sustained Yield)	255
Modification of the Safe Yield Concept	256
Mining Yield	257
Perennial Yield	259
7.5 Recharge to Groundwater	260
Natural Recharge	260
Artificial Recharge	261
7.6 Analytical Methods	264
Seepage from Streams	265
Infiltration from Recharge Basins	268
Problems and Discussion Questions	275
References	277
<b>Chapter 8 WATER WELLS . . . . .</b>	<b>283</b>
8.1 Artesian Wells: Steady State	283
Single Artesian Wells	285
Combined Effects of Well Operation and Natural Uniform Flow	293
Combined Effects of Discharge and Recharge Wells	297
Method of Images	303
8.2 Artesian Wells: Transient Conditions	310
Theis Formula	311
Determination of Aquifer Parameters by Pumping Tests	318
Straight-Line Method	323
Constant Drawdown Tests for Flowing Artesian Wells	331
8.3 Leaky Artesian Aquifers	334
Steady-State Flow	335
Transient Conditions	337
8.4 Comments on Graphic Matching	350
8.5 Use of Image Wells: Transient Flow	352
Locating Single Boundaries	352
Streams Completely Penetrating Artesian Aquifers	358
8.6 Effects of Natural Flow	358
8.7 Multiple Wells and Boundaries	361
8.8 Losses, Specific Capacity, and Well Efficiency	363
8.9 Partially Penetrating Artesian Wells	368
8.10 Gravity Wells	372
Steady-State Conditions	373
Transient Conditions	388
8.11 Land Subsidence Due to Well Pumping	398
Problems and Discussion Questions	407
References	414

<b>Chapter 9 SALTWATER INTRUSION . . . . .</b>	<b>418</b>
<b>9.1 Ghyben-Herzberg Interface</b>	<b>418</b>
<b>9.2 Limiting Conditions of Saltwater Intrusion</b>	<b>421</b>
<b>9.3 Hydrodynamic Effects on the Interface</b>	<b>424</b>
<b>9.4 Modified Ghyben-Herzberg Curve</b>	<b>431</b>
<b>9.5 Model Studies</b>	<b>434</b>
<b>9.6 Deviation from Idealization</b>	<b>437</b>
Earth Tides, Ocean Tides, and Seismic Waves	437
Dispersion and Diffusion of Salt Water	438
Layered Systems	441
<b>9.7 Disturbance of the Natural Interface</b>	<b>443</b>
Upconing due to Drains	445
Upconing due to Discharge Artesian Wells	446
Growth of Saltwater Zone due to Well Pumping (Artesian)	448
Upconing due to Discharge Gravity Wells	455
<b>9.8 Control of Saltwater Intrusion</b>	<b>459</b>
Potential Methods of Control	459
Control by Recharge Wells	462
Hydraulic Barriers	470
Control by Regulation of Activities	472
<b>Problems and Discussion Questions</b>	<b>472</b>
<b>References</b>	<b>474</b>
<b>APPENDIX A: SYMBOLS AND ABBREVIATIONS</b>	<b>478</b>
<b>APPENDIX B: CONVERSION TABLES</b>	<b>489</b>
<b>APPENDIX C: PROOF OF EQ. (5.14)</b>	<b>494</b>
