

## **Table of Contents**

Advances in Structural Optimization (José Herskovits)

1. Introduction to Structural Optimization
2. Mathematical Formulation of Optimization Problems
3. Basic Concepts in Structural Mechanics
4. Unconstrained Optimization Methods
5. Constrained Optimization Techniques
6. Sensitivity Analysis in Structural Systems
7. Nonlinear Programming Methods
8. Structural Optimization of Discrete Systems
9. Continuum Structural Optimization
10. Computational Algorithms and Implementation
11. Engineering Applications
12. Advanced Topics and Recent Developments
13. Conclusion and Future Trends
