

# Table des matières

Engineering Thermodynamics	1-1
11 Fundamentals	1-2
12 Control Volume Applications	1-14
13 Property Relations and Data	1-22
14 Combustion	1-58
15 Exergy Analysis	1-69
16 Vapor and Gas Power Cycles	1-78
17 Guidelines for Improving Thermodynamic Effectiveness	1-87
43 Heat Exchangers	4-47
44 Bioheat Transfer	4-111
45 Thermal Insulation	4-185
46 Energy Audit for Buildings	4-197
47 Compressors	4-213
48 Pumps and Fans	4-242
49 Cooling Towers	4-250
410 Heat Transfer in Manufacturing	4-261
18 Exergoeconomics	1-88
19 Design Optimization	1-95
110 Economic Analysis of Thermal Systems	1-102
Fluid Mechanics	2-1
21 Fluid Statics	2-2
22 Equations of Motion and Potential Flow	2-11
Dimensional Analysis and Data Correlation	2-25
24 Hydraulics of Pipe Systems	2-41
25 Open Channel Flow	2-58
26 External Incompressible Flows	2-66
27 Compressible Flow	2-77
28 Multiphase Flow	2-94
29 NonNewtonian Flows	2-110
Heat and Mass Transfer	2-124
32 Convection Heat Transfer	3-12
322 Forced Convection External Flows	3-23
323 Forced Convection Internal Flows	3-44
324 Convection Heat Transfer in NonNewtonian Fluids	3-53

33 Radiation	3-62
34 PhaseChange	3-88
342 Particle Gas Convection	3-104
343 Melting and Freezing	3-110
35 Mass Transfer	3-124
Applications	3-158
41 Water Desalination	3-160
42 Environmental Heat Transfer	4-17
411 Pinch Point Analysis	4-284
412 Cryogenic Systems	4-314
413 AirConditioning Systems	4-333
414 Optimization of Thermal Systems	4-368
415 Heat Transfer Enhancement	4-405
416 Heat Pipes	4-416
417 Liquid Atomization and Spraying	4-428
418 Thermal Processing in Food Preservation Technologies	4-437
419 Thermal Conduction in Electronic Microstructures	4-455
420 Cooling in Electronic Applications	4-502
421 Direct Contact Heat Transfer	4-541
422 Temperature and Heat Transfer Measurements	4-565
423 Flow Measurement	4-589
424 Applications of Artificial Neural Networks and Genetic Algorithms in Thermal Engineering	4-617
Numerical Analysis and Computational Tools	4-660
52 Finite Difference Methods	4-661
53 Finite Element Method	5-11
54 Boundary Element Method	5-34
55 Software and Databases	5-43
Appendices	5-48
<a href="#">Appendix A Properties of Gases and Vapors</a>	5-49
Appendix B Properties of Liquids	32
Appendix C Properties of Solids	35
Appendix D SI Units and Conversion Factors	38
Index	44
