

Table of Contents

1. **Electrical Power Systems**
 - Generation of electrical power
 - Structure of power systems
 - Power-system components
 - Load characteristics and load curves
2. **Electrical Power Transmission**
 - Transmission systems and voltage levels
 - Transmission-line parameters
 - Resistance, inductance, and capacitance
 - Performance of transmission lines
 - Voltage regulation and efficiency
3. **Overhead Transmission Lines**
 - Types of conductors
 - Line supports and insulators
 - Sag and tension
 - Corona
 - Mechanical and electrical considerations
4. **Underground Cables**
 - Cable construction
 - Types of underground cables
 - Insulation and dielectric stress
 - Cable capacitance
 - Testing and applications
5. **Electrical Distribution Systems**
 - Distribution networks
 - Primary and secondary distribution
 - Radial, ring-main, and interconnected systems
 - Distribution substations
 - Voltage drop and distribution efficiency
6. **Substations**
 - Types and functions of substations
 - Substation equipment
 - Busbars and switchgear
 - Transformers
 - Protective and control equipment
7. **Electrical Protection**
 - Protection principles
 - Fuses and circuit breakers
 - Relays
 - Overcurrent and earth-fault protection
 - Protection of transformers, generators, and transmission lines
8. **Power Factor Improvement**
 - Power factor and its significance
 - Causes of low power factor
 - Power-factor correction
 - Static capacitors and synchronous condensers
 - Economic advantages of power-factor improvement

9. Electrical Utilization

- Domestic and industrial electrical installations
- Electrical heating
- Electric welding
- Electric drives
- Illumination and lighting

10. Electric Traction

- Principles of electric traction
- Traction systems
- Electric traction motors
- Braking methods
- Applications of electric traction

11. Electric Drives

- Electrical drive systems
- Characteristics of drive motors
- Speed control
- Starting and braking
- Industrial applications

12. Illumination and Lighting

- Fundamentals of illumination
- Lighting sources
- Illumination calculations
- Indoor and outdoor lighting
- Lighting efficiency
